

Special Issue On ESG Compliance Through ISO Standards (Drive Sustainability, Protect Environment, Social Trust & Value)

CELEBRATION OF WORLD ENVIRONMENT DAY – 2025

CMD

Mr. Sundar Kataria

International Certification Services and its group companies have been celebrating World Environment Day each year for the past two and half decades.

This year also we celebrated Paryavartan 4.0 WED 2025 on 7th June 2025, by organizing a environmental conclave on virtual zoom platform.

The burning international issue has been highlighted to protect life cycle. Hence ICS focus

during the conclave has been Environmental Social Governance so as to increase awareness about environment and social due to climate change in order to save our mother earth due to climate change in order to save our mother earth for future generation. The main theme and title of the WED's Paryavartan conclave has been ESG: Environmental Social Governance compliance through ISO standards, international management system related to environmental protection. Paryavartan 4.0, 2025, World Environment, half day event was conducted on virtual platform with eminent speakers; brief summary of the above events is given below. The following main topics have been covered during the deliberation by the environment specialist representing manufacturing industry, consultants, MSME and specialists representing manufacturing and service industry. Given below the various topics covered by the speakers followed with panel discussion and Question & Answers.

- Welcome and Introduction
- Sustainability and GHG reporting
- Authentic assurance for sustainability
- Environmental management system, ISO 14001:2015
- EnMS: Energy Management System, ISO 50001:2018
- Green Gas verification & validation, ISO 14064:2019
- GHG Footprint, ISO 14067:2018, ISO 14046:2004
- Social Responsibility, ISO 26000
- ESG, compliance and reporting

After the presentation by the eminent speakers, a panel discussion also conducted by having all the speakers and more environmental and ESG experts. The conclave on Paryavartan 4.0 was attended by nearly 300 delegates representing manufacturing and service industry. The program followed by quiz, poster, painting and poem competition for children and adults.

The Paryavartan 4.0 was closed with summarizing highlights and vote of thanks given to the honorable chief guest, speakers, delegates and ICS organizing team.

The proceeding of the Paryavartan 4.0 will be available on multimedia Youtube and linkedin, we received good feedback from the delegates by having a well-organized conclave.

EnMS - Energy Management system - ISO 50001

Consultant, Trainer and Auditor, Galaxy Inc,

Mr Jayant Shiradkar

ESG through Road-map of Energy-Management as a Catalyst Powering Sustainable Progress

The essential criteria for responsible business is attainable by implementing Environmental, Social, and Governance (ESG). ESG goals for enabling systematic energy efficiency improvements and reduced environmental impact is supported by International ISO standard 50001 of Energy Management Systems. Tailored ESG approaches are adopted in manufacturing sector emphasizing energy efficiency and emission reductions, unlike in Finance focusing on sustainable investing and climate risk management. The Healthcare sector prioritizes equitable energy access while technology sector addresses responsible data governance and Energy -Utility sector is at the most forefront, transitioning by renewable adoption and decarbonization. ISO 50001 provides structured energy management across all sectors.

Energy management system (EnMS) is in alignment with the ESG Frameworks, including Global Reporting Initiative (GRI) for energy disclosures, Task Force on Climate-related Financial Disclosures (TCFD) for risk management, and Science-Based Targets initiative (SBTi) for emissions. It complements the EU Energy Efficiency Directive requirements and integrates with ISO 14064 carbon accounting systems. Implementation of EnMS, addresses all three critical ESG concerns, from Environmental benefits of GHG emission reduction and resource optimization, Social impacts encompassing improved energy access and workplace efficiency to Governance advantages of transparent reporting and regulatory compliance. EGG-focused legislation like EU Corporate Sustainability Reporting Directive (CSRD) and U.S. SEC climate disclosure rules require energy performance reporting and implementation of ISO 50001 enables structured compliance while supporting Paris Agreement climate goals.

The role specificity of EnMS well integrates with complementary standards of ISO namely 14001 (Environmental Management), ISO 26000 (Social Responsibility), ISO 37001 (Anti-Bribery), ISO 45001 (Occupational Health), and ISO 27001 (Information Security). The integration of ESG with EnMS transforms businesses into internationally recognized, climate resilient and socially responsible, through the alignment of their operational excellence. Cumulatively resulting in cost reduction, efficient energy use, improved ESG ratings, and risk mitigation. Benefiting the Policymakers to achieve standardized energy data access, alignment with climate targets, and harmonized ESG reporting across industries.

Dr. Rakesh Kumar

Greenhouse Gas Verification & Validation

President of Society of Indoor Air

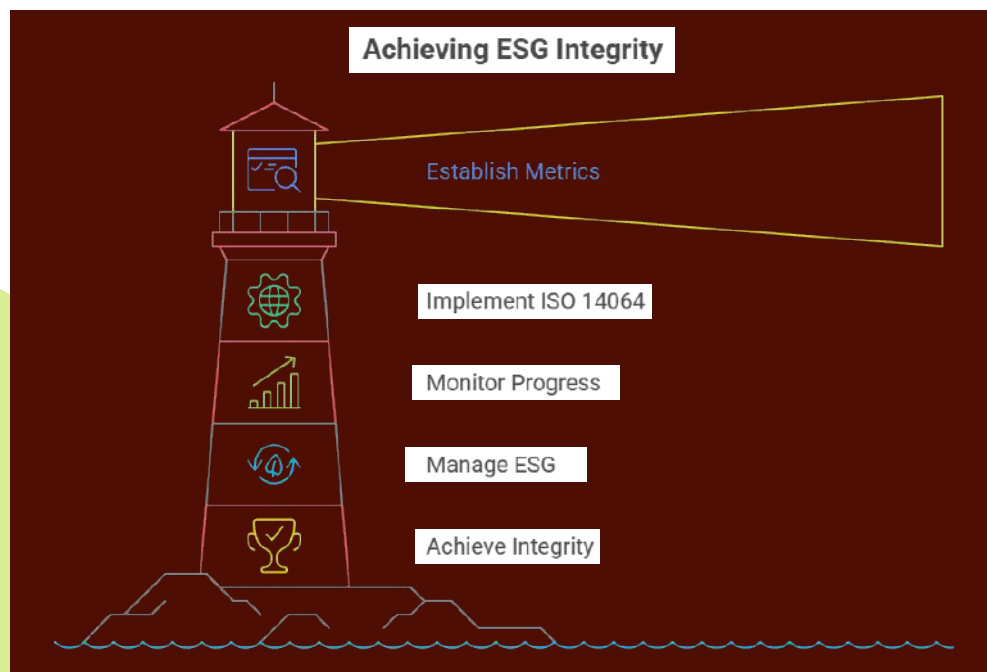

Measuring Tomorrow: ISO 14064 as the Architect of ESG Integrity

The three beneficial strategic of ESG are Environmental that drives carbon reduction and climate resilience; 2nd is the Social, Promoting equitable transitions and public health and finally Governance which enhances transparency, compliance, and stakeholder trust. ESG integration is no more an option but critical necessity in ensuring sustainability compliance. Turning ESG from aspiration into verifiable action aligning with the global goal of Paris Agreement can be achieved from quantifying Scope 1, 2, and 3 emissions of ISO 14064. The essence of ISO 14064 is captured from the insight of accurate measurement and understanding of greenhouse gas (GHG) emissions as the foundation of credible ESG performance.

ISO 14064 provides the global standard for GHG accounting and verification, guiding organizations to embed carbon accountability into strategy, operations, and reporting. The Greenhouse gases and their quantification have sectoral relevance through scope alignment with ESG synergy.

The manufacturing sector GHG emphasizes on tracking process-level emissions while Finance assesses climate risks and investment impact, Oil & Gas sector ensures lifecycle GHG transparency and Technology sector measures emissions across digital infrastructure unlike Agriculture-food sector that evaluates sourcing, land use, and livestock emissions. Scope 1 (direct), Scope 2 (energy), and Scope 3 (value chain), of ISO 14064 complements the GHG Protocol, CDP, and SBTi—enabling climate-smart procurement, low-carbon innovation, and circularity.

ISO 14064 supports regulation by EU CSRD, SEC climate disclosures, carbon markets, and net-zero tracking. It aligns with sustainable finance taxonomies and verifiable carbon credit systems. ISO 14064 empowers organizations to lead with ESG integrity—anchoring sustainability in science, accountability, and action; A journey, facts matter as rightly said “what gets measured, gets managed”.

Dr. Prasad Karnik

Social Responsibility ISO 26000

Technical Director at International Institute of Sleep Sciences (IISS),

Beyond Bans and Bags: ISO 26000 as a Blueprint driving Circular Solutions for Sustainable Plastic Waste Management

The guiding principle, **'We do not inherit the Earth from our ancestors; we borrow it from our children,'**

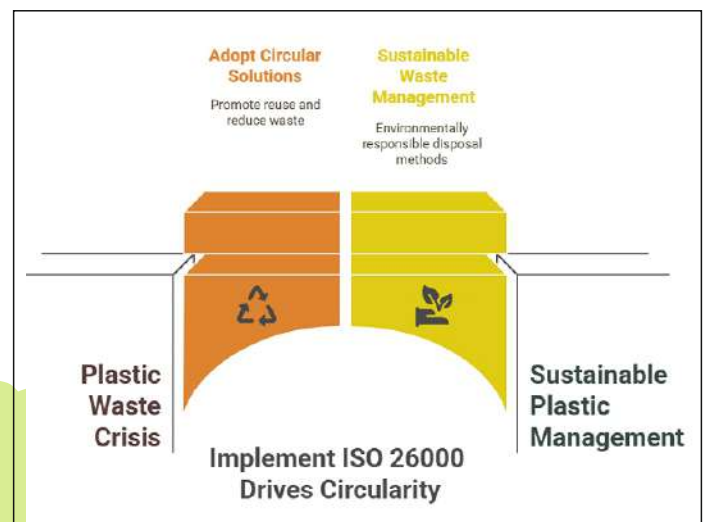

reminds us that every material we use—whether plastic or water—carries a responsibility toward future generations. Plastic revolutionized the healthcare, agriculture, construction, and consumer goods sectors in the mid-20th century due to its durability and affordability. Owing to its non-biodegradable nature and rampant misuse, it has become a double-edged sword, leading to catastrophic pollution, clogging ecosystems, endangering wildlife, and infiltrating food chains with micro-plastics. The 3R Strategy of Reduce, Reuse, Recycle a globally endorsed framework offers a pathway to mitigate plastic waste. Replacing single-use plastics with alternatives of cloth bags and bamboo utensils, reduces plastic accumulation into landfills. Repeated use of plastic containers and packaging materials focuses on the reuse of plastic, extending its product life-cycles. Segregation and reprocessing option of recycling plastic minimizes reliance on virgin plastic.

ISO 26000 provides a blueprint for responsibility from its strategic framework for organizations to embed sustainability into operations. It Advocates responsible resource use and pollution prevention, Engaging stakeholders to design community-driven waste solutions and Prioritizing transparency and lifecycle thinking in product design. By aligning with ISO 26000, businesses can drive innovation in eco-friendly alternatives and foster systemic change toward plastic-free ecosystems.

Governments must enact regulations to phase out non-recyclable plastics, incentivize sustainable practices, and invest in waste management infrastructure. Public awareness campaigns and cross-sector collaboration are critical to scaling solutions.

"To see a World in a Grain of Sand,
And a Heaven in a Wild Flower,
Hold Infinity in the palm of your hand,
And Eternity in an hour." —William Blake, "Auguries of Innocence"

A collective effort from all stakeholders—users, governments, and policymakers—is essential to foster true environmental stewardship. The vision of seeing a 'Heaven in a Wild Flower' reminds us that even the smallest acts of responsibility contribute to a more sustainable future. As guardians of the planet, our choices—whether in industry, governance, or everyday life—must be guided by foresight, humility, and care. For, as the timeless wisdom goes, the Earth is not ours to possess, but to protect for those yet to come.

GHG Footprint - ISO 14067:2018 + ISO 14046:2014

Consultant, Blue & Green ESG

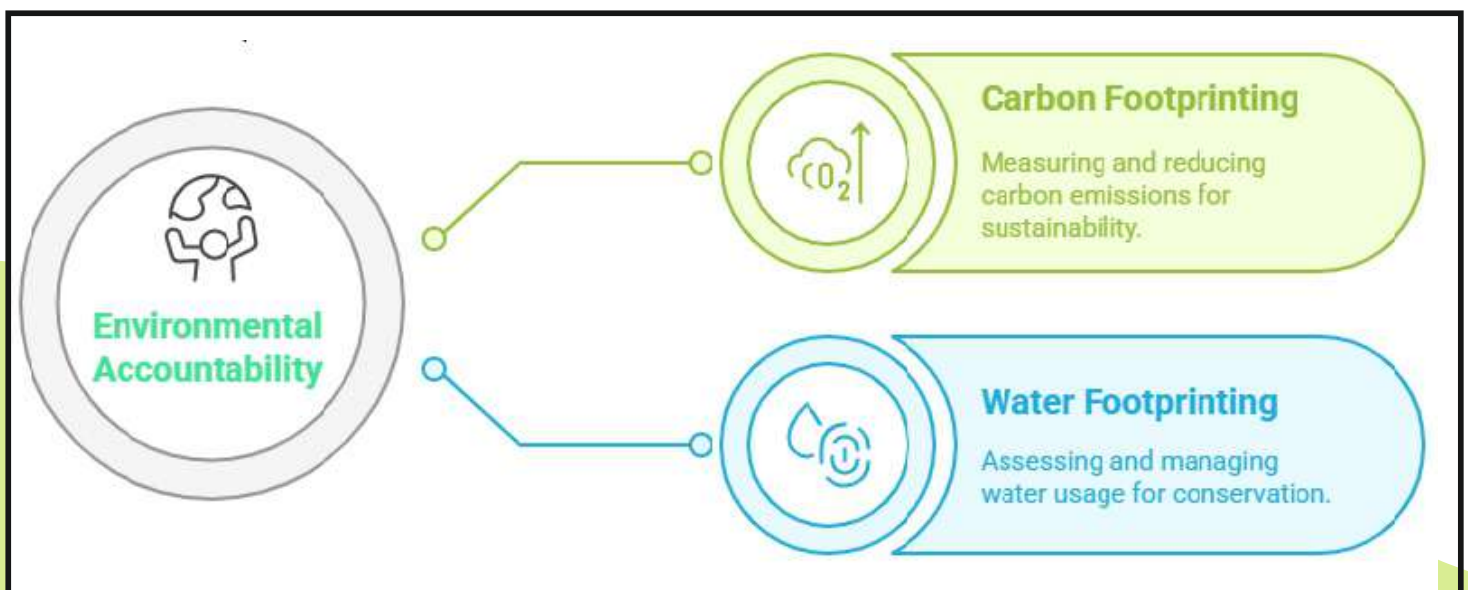

Twin Pillars of Environmental Accountability -Carbon & Water Footprint Sustainability Tools: Life Cycle Assessment for a Resilient Future, Low-Carbon and Water-Responsible Growth

Mr. V S Bhaskar

“Water flows through the veins of progress, but its stewardship defines the legacy of a nation.” Similarly, carbon and water footprinting are now central to sustainability strategies across industries. **ISO 14046 and ISO 14067 standards** defines the methodology for assessing a product and **water footprint** respectively using Life Cycle Assessment (LCA). water footprint quantifies total water used, polluted, or degraded—addressing scarcity, quality, and ecosystem impact. Sectors such as **agriculture, textiles, power generation, mining, and food processing** face significant water-related challenges and must evaluate both direct and embedded water use. While global leaders like Unilever and Nestlé integrate water footprints into Environmental Product Declarations (EPDs), India is advancing through initiatives like Jal Shakti Abhiyan and NITI Aayog’s Composite Water Index. Yet, standardized frameworks, localized data, and capacity building remain ongoing needs.

Meanwhile, **ISO 14067** enables quantification of **carbon footprints** across the product lifecycle—from raw materials to disposal—using LCA to calculate emissions in CO₂-equivalents. Industry-specific carbon hotspots vary: **manufacturing** focuses on energy use; **agriculture** on methane and fertilizers; **construction** on embodied carbon; and **electronics** on production and obsolescence. Both standards support regulatory compliance, enhance ESG disclosures, and improve resource efficiency. Globally, ISO 14067 aligns with the **EU Green Deal** and **Digital Product Passport**, and is integral to Scope 3 emission reporting. In India, although BIS has adopted ISO 14067, widespread adoption is gradual. Early movers like Tata, Infosys, and ITC demonstrate leadership, but national scale-up requires localized LCA databases and trained professionals. Together, **ISO 14046 and ISO 14067** provide the tools industries need to measure, manage, and report water and carbon impacts—laying the foundation for resilient, responsible, and resource-efficient growth.

Mr. Dilip Negi

Strategy for Implementing ESG in an Organization Through ISO Standards

Vice President - Strategy & Planning

To commemorate **World Environment Day-2025**, ICS organized “Paryavartan-2025” a virtual webinar focused on environmental awareness. This year, the event emphasized **ESG (Environmental, Social, and Governance) compliance** through the application of ISO standards to promote sustainability, social responsibility, and ethical governance.

While there is no ESG-specific ISO standard, many **ISO frameworks support ESG integration** by offering structured guidance, performance benchmarks, and credibility.

A phased approach to ESG implementation includes:

1. Assessment & Planning
2. Policy Formation
3. Implementation & Capacity Building
4. Monitoring & Evaluation
5. Continuous Improvement & Reporting

Environmental Strategy (E): Sustainability and Stewardship

Environmental ISO standards help organizations reduce their ecological footprint and comply with regulations.

- **ISO 14001** establishes an Environmental Management System (EMS) for setting objectives and improving environmental performance.
- **ISO 14064** aids in quantifying and reporting greenhouse gas emissions.
- **ISO 50001** improves energy efficiency and performance.
- **ISO 14046** and **ISO 14044** help assess water usage and product life cycle impact.

Outcomes: Reduced carbon and energy use, better regulatory readiness, and improved brand image.

Social Strategy (S): Responsibility and Human Capital

Social standards reflect an organization's values toward employees and communities.

- **ISO 45001** ensures workplace safety and health.
- **ISO 26000** guides ethical and socially responsible behavior.
- **ISO 30414** supports transparent human capital reporting.
- **ISO 20121** helps organize sustainable events.

Outcomes: Higher employee engagement, stronger community ties, and improved ethical standards.

Governance Strategy (G): Integrity and Accountability

Governance standards ensure ethical conduct, risk management, and secure operations.

- **ISO 37001** combats bribery and corruption.
- **ISO 37301** supports legal and regulatory compliance.
- **ISO 37002** protects whistle blowers.
- **ISO/IEC 27001** ensures cybersecurity and data protection.

Outcomes: Increased trust, stronger compliance, and enhanced data integrity.

Cross-Cutting ISO Standards

- **ISO 9001** – Quality management
- **ISO 31000** – Risk management
- **ISO 19011** – ESG auditing and assurance

Conclusion

Integrating ESG principles using ISO standards is not just a regulatory obligation—it's a strategic enabler for long-term value creation, resilience, and stakeholder trust. ICS's initiative to connect ESG awareness with ISO standards during its "Parivartan" event reflects a visionary approach.

By aligning with the relevant ISO standards under each ESG pillar, organizations can transition from reactive compliance to proactive sustainability leadership. The resulting benefits include operational efficiency, risk mitigation, enhanced reputation, and a meaningful contribution to global sustainability goals.

Dr. Dipti V
LakheChawade

Climate Change and the Role of ISO Standards

सर्वे भवन्तु सुखिनः, सर्वे भवन्तु निरामयाः
Auditor ICS

Climate change threatens ecosystems, health, and livelihoods globally, driven by rising temperatures, extreme weather, and biodiversity loss. Addressing this crisis requires global cooperation, robust

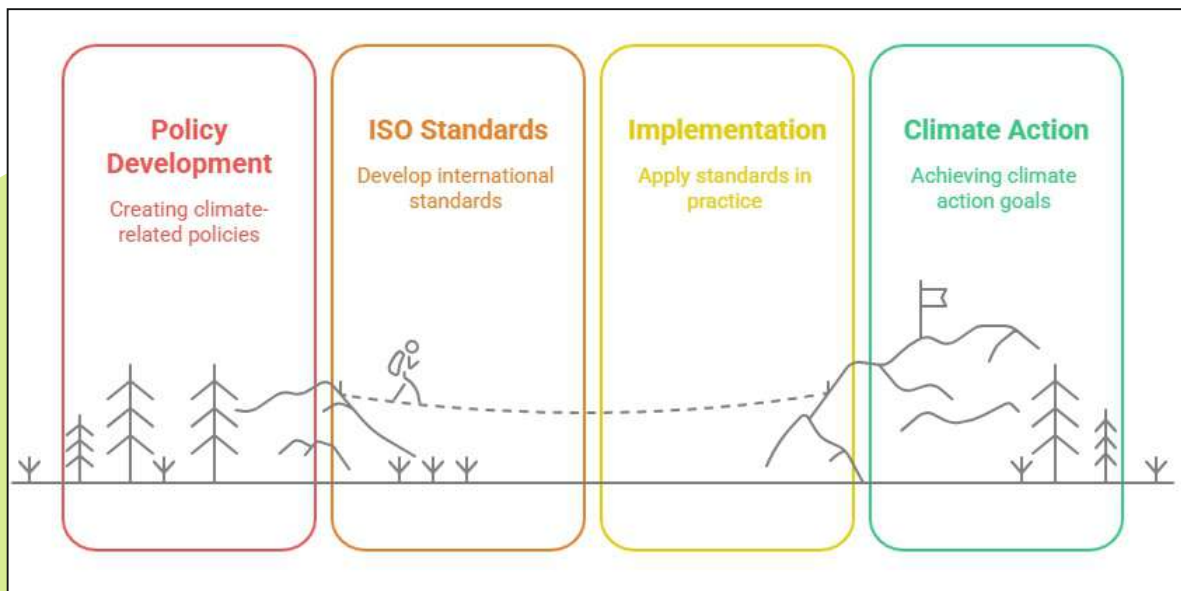

policies, and standardized frameworks to translate commitments into measurable action. The Paris Agreement and national net-zero targets have spurred carbon reporting mandates and climate-resilient strategies. Yet, achieving these goals demands science-based tools to harmonize efforts across sectors and borders. The ISO Standards are enablers for stringent and effective Climate Action policy implementation. The International Organization for Standardization (ISO) offers critical tools to combat climate change through integrated or individual standards of ISO 14064 : Quantifies greenhouse gas (GHG) emissions, ISO 14067 : Measures product carbon footprints across lifecycles, ISO 50001 : Optimizes energy efficiency to cut emissions, ISO 14001 : Strengthens environmental management systems, ISO 14080 : Guides climate strategy development.

These standards provide a universal framework for transparency, compliance, and alignment with sustainability goals.

Implementing ISO standards empowers organizations and governments benefiting across the sectors and Policymakers, building accurate GHG inventories for regulatory compliance; Mitigating risks via sector-specific decarbonization (e.g., energy, manufacturing). Enhancing stakeholder trust through independent verification. Driving innovation in low-carbon technologies and circular systems.

While EU nations and MNCs integrate ISO standards into ESG reporting and eco-labeling, India's adoption is uneven to date. Export-driven sectors like automotive and FMCG lead, supported by the Bureau of Energy Efficiency (BEE) and CPCB. Challenges include data gaps and capacity-building needs. Necessitating industries to adopt ISO standards and unlock competitive advantage through resource efficiency. For policymakers, they offer a blueprint to align regulations with climate resilience and trade requirements.

A single footprint fades, but a collective path endures, reflecting on the universal goal of collective well-being and health, which climate change now directly threatens. ISO standards and ESG frameworks provide structured, accountable approaches to mitigate environmental risks and promote sustainability. Aligning our actions through policies and purpose ensures a healthier planet, where ancient wisdom meets modern responsibility. Unitedly emphasizing collaborative efforts to ensure long-term climate resilience.

Horoscope Month of July - 2025

Aries

There is a strong energy this month. You may feel confident to take bold moves. Others will notice your presence; words will carry more weight. So, take care not to act too aggressively or with impatience in day-to-day matters. Health may require some attention; do not ignore its signs, however minor they may seem. Although you may want to do everything your way, it would be beneficial to also consider others' perspectives. Keep working on your self-improvement and new initiatives. Avoid using ego in relationships; speak softly.

Taurus

It's a great month for looking within and contemplating life. Perhaps you'd prefer formal solitude or to devote time to spiritual pursuits. Rest is highly paramount in this situation, so grant your body and mind some peace. Finances may require careful monitoring, so try to avoid sudden expenditures. If something is beginning to end in your life, do not be afraid, as it signifies the dawn of better things. You may grieve, but now it is your chance to know the strength that resides within you. Sleep well and keep your daily routine simple.

Gemini

The month is full of opportunities for growth, along with activity with helpful people. Support can come from friendships or senior colleagues at work. If you are pursuing any of your goals or dreams, now is the time to step closer. Now is the time for your hopes to take form, provided you remain diligent and focused. Be open to cooperation; good results may come through other efforts. Your finances may bloom or receive a new chance. Yet, do not set your expectations too high; stick with the basics when it comes to planning.

Cancer

This month brings you strength in your career. You will get opportunities to earn a name and take bigger responsibilities. If you work sincerely, success is sure to follow. Seniors may notice your efforts, so give your best without fear. Do not be complacent; do not wait for others to tell you what to do. This is the ideal time for you to take charge of your work responsibilities. However, do not forget your family in the race for achievements. Maintain a balance between personal and professional life. If it becomes too demanding, take short breaks to refresh your mind.

Leo

It is a good month to focus on learning, travelling, and thinking positively. You may find yourself feeling more hopeful and ready for new things. If you're considering pursuing something or embarking on a trip, do so; it will provide a rich experience. Luck favours you; yet, it is equally important to fulfil all the requirements honourably. If you feel stuck, consider contacting elders or individuals with a deep spiritual connection; they may have valuable insights to share with you. Do not ignore that inner voice of yours this time. This might be a time when your faith in reality gets boosted.

Virgo

The month suggests a cautious and quiet approach. A sudden change may alter your mood or way of living, so take a deep breath and compose yourself before taking action. Some secrets may come forth, or something from the past may need your attention. Health may require special attention at this time by maintaining a proper diet and avoiding excessive work. If there is any stress, then focus on relaxation and prayer. This is also a good time for pursuing deep investigations such as astrology, healing, or research. You grow stronger from within when you accept life on its terms.

Horoscope Month of July - 2025

Libra

This month is focused on developing close relationships. There may be increased involvement with partner, or discussions concerning important issues, such as marriage or business partnerships, may arise. Try to calm your mind and listen to what the other party has to say. The ego must be curbed; otherwise, even trivial matters will turn into larger issues. If you're single, you may encounter a potential partner. There may also be opportunities to work with a partner, but make your decisions wisely after careful consideration.

Scorpio

This is a strong time for addressing and overcoming difficulties. There may be a more active approach than a solution-oriented one towards health, work, or daily life. Enmity and competition may arise to put one against the odds, but with purposeful effort, you will prevail. Refrain from late activities, focus on your tasks, and stick to discipline. Some attention to health maintenance will be in order, including a balanced diet and adequate rest. If legal matters are pending, the moment is favourable for you. Do not waste energy on temper and irrelevant fights, but channel it into constructive means.

Sagittarius

The creativity and love for children are in for an illuminating month ahead. You will feel freer to express yourself and live your life. If love has touched you, it's a good time to cement it further. Enjoyment from children is expected; however, attention is also needed. Those preparing for exams or studying should focus, as the mind tends to wander. Be wise enough to channel your energies into creating, rather than squandering time on partying and distractions. Luck may favour you in gambling or speculation, but be sure to exercise restraint.

Capricorn

This month brings your attention to home, family and inner peace. You may be feeling like spending more time with your loved ones or attending to home-related matters. Try to improve your bond with your parents and elders; they may need your care. You may also be considering purchasing something for the home or making some changes. Maintain a balance at work and avoid letting personal matters overwhelm you. Take care of your health, especially your heart and mental peace. Meditation and some quiet time can be beneficial. This month is about drawing in strength from within.

Aquarius

This month gives power and courage to move ahead with full confidence. You will feel more active, and your communication will become stronger. It is a time for speaking one's mind, exchanging ideas, and short travels. Support may come from siblings or close friends. If you're going to do something new, this is the time to take that first step. Things will be happening; yet, the people who will catch the opportunity are those who are consistent with follow-through. Avoid arguments and being overconfident in your speech. Value your time and stay focused on your goals.

Pisces

The focus this month will be on your financial situation, speech, and family values. You feel the need to earn more and save better. Good opportunities may arise, but be cautious when it comes to matters of money. Avoid flaunting riches or spending for ego. Use pleasing words, for they work wonders. Time spent in family talks should take priority, so spend quality time with your family and maintain harmony. If you have a new plan for income, get it all chalked out first. Eat lightly and take care of your throat or stomach this month. It is also good for learning about traditions or ancient knowledge.

WINNERS OF POEM COMPETITION

1. Atul Inkar

धरती की पुकार

पेड़ की छांव, हवा का गीत,
पल्लियाँ रचती मधुर संगीत।
नदियां बहती कहे कहानी,
पहाड़ की जुबां पुरानी।

पर धुएँ ने अब दका गगन,
कूड़े से भरा है जल-चमन
पंखी उड़ते छोड़ बसेरा,
सूनी हो गई हर दगर मेरा

अब भी मौका बाकी है,
संभाल लें हम ये धरती प्यारे
एक पेड़ लगाएँ, जीवन पाएँ,
हरियाली से रिश्ते निभाएँ

3. Sanchi Gamare

Those unheard echoes:-

Beneath the buzz of city sound,
In boardrooms bright where everything till now seems right,
Beyond the glass of our office doors.
The world outside is mumbling clear,
It's voice is one we all must hear.
We built our towers with pride and so high,
Chasing progress, reaching skies.
No more boundaries now keeping us down,
We plan, we print, we build, we strive
All we got this from Nature that help us all to thrive !
But the pulse of earth still hums around.
So take a moment at once and recognize it all.
What can I change? What can I do?
Not just cleaning beaches or something wide and grand
But in each light switch, each tap, every hand
The power lies in daily choice.
Recycle, switch off unnecessary, waste no more
Let the greener habit soar. From every small paper saved to cleaner skies
Each of this small acts count in our planet rise.
Let's lead with care, vision wide
With nature standing all by our side.

2. Dr Anisha Ria Cardozo

POEM By Dr Anisha Ria Cardozo

"The ISO way "

On this green and sacred day,
Let ISO light our guided way.
Through audits, goals, and plans
refined,
A cleaner Earth, by choice, not blind.

With 14001, waste declines,
We walk in sync with nature's signs.
ESC in heart, not just in file—
Compliance now with ethical style.

Not just a badge, but how we live,
To Earth, our people—we must give.
ISO our map, ESC our soul,
Together they define our goal.

ISO 14001, our green vow sworn,
To heal the Earth where she's been
torn.

Waste reduced and risks controlled,
A cleaner path, brave and bold.

ISO 45001 brings care,
To every worker, everywhere.
Health and safety, human right—
In every plant, from day to night.

ISO 26000 lends the voice,
To social good, to conscious choice.
From ethics strong to fair supply,
It helps our moral standards fly.

Through ESC, we lead with grace—
Environment, people, workplace place.

No token pledge, but action clear,
With every audit, hope draws near.

We don't just plant, we plan and act,
With standards firm and purpose
packed.
Each ISO clause, a greener code,
To walk the sustainable road.

Environmental promise, social grace,
In every project, every place.
ESC, our moral ground,
Where harmony and hope are found.

ESC compliance isn't just law—
It's a pledge the Earth stands for.
On June the 5th, we raise our voice—
Standards matter. Let's make the
choice.

WINNERS FOR POSTER COMPETITION

1. Rhea Chhabria

2. Piyush Solanki

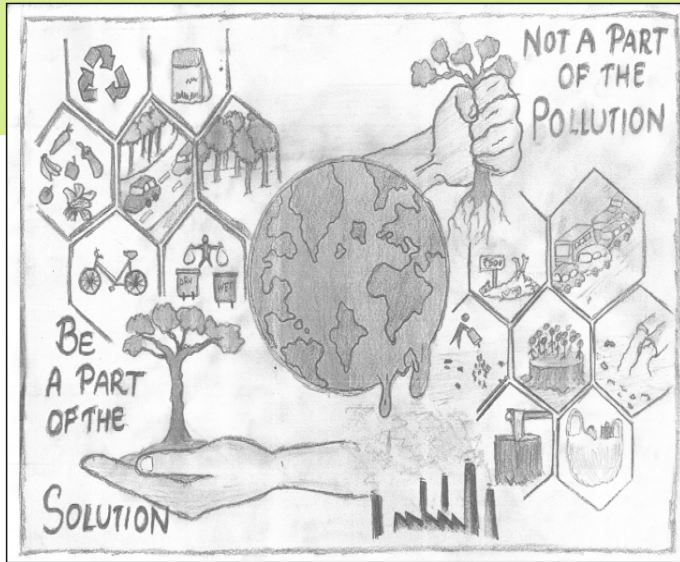

3. Dr Anisha Ria Cardozo

WINNERS OF DRAWING - DRAWING - ADULT COMPETITION

1. Ravi Gupta

2. Rohit Jadhav

3. Piyush Solanki
