QUALITY & LEADERSHIP ENSURE BUSINESS CONTINUITY & SUSTAINABILITY

We are celebrating the World Quality Day on Thursday, 9th Nov 2017, to share our vast experience in the field of Quality through certification of the various ISO Management   Systems. The adoption of ISO Management System is a strategic decision that can help to improve overall performances and provide sound bars for sustainable development and business continuity.

The potential benefit to an organization of implemented ISO relevant, management system based on the International Standard recognized world wide are :

a)   the ability to consistently provide product and services that meets customer and applicable statutory and regulatory requirements;

b)   facilitating opportunities to enhance customer satisfaction;

c)   addressing risks and opportunities associated with its context and objectives;

d)   the ability to demonstrate conformity to specified quality management system requirements.

All ISO standards are on common ISO Anex. SL platform, the international standard employs the process approach, which in corporate the Plan - Do - Check - Act (PDCA) cycle and risk - based thinking.

International Management System consistently meeting requirements and addressing future needs and expectation poses a challenges for organization environment. To achieve this objectives, the organisation might find it necessary to adopt various forms of improvement in addition to correction and continual improvement, such as breakthrough change, innovation and reorganization.

The ISO management principles are :
- Customer focus,
- Leadership,
- Engagement of people,
- Process approach,
- Important,
- Evidence based decision making,
- Relationship management,

LEADERSHIP is very vital for the success of the organization that will ensure business continuity and sustainability. Top management shall demonstrate leadership and commitment with respect to the relevant ISO management system by:
